

## MULTI-TASKING CHUCK

**NEW**

A revolutionary 3-jaw chuck, collet chuck, and I.D. workholding system all-in-one. Handles every job and eliminates the need to change out your lathe workholding.

## QG-65 COMBO CHUCK

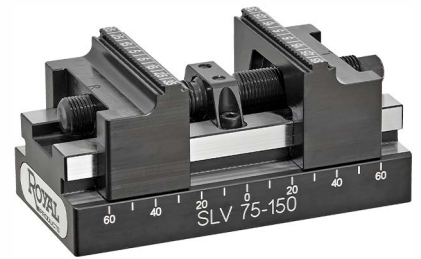

**NEW**

Switching from O.D. to I.D. gripping is a snap with the Royal Combo Chuck. Perfect for sub-spindles because the Accu-Length™ design guarantees precise part transfer.

## SLV™ - STURDY LITTLE VISE

**NEW**

Tremendous grip force for more aggressive chip removal. Unique box way jaw design and elevated spindle combine to provide extreme rigidity and eliminate jaw lift.

## POWER-BLOCK QG-32 FIXTURE

**NEW**

Actuated either by air or hydraulics. Compact footprint enables close ganging for multi-part applications. Booster piston available for extra clamping force.

## QG-100/QG-65 ADAPTER

**NEW**

Brings added versatility to your Royal QG-100 Collet Chucks by enabling QG-65 collets to be used on small diameter jobs.

## ROTA-RACK™ COMPACT

**NEW**

Designed specifically for small parts (Swiss applications). Twelve-bucket design for easy part segregation. Simple programming via the PLC, or index via M-code.
