

OUTSMART COMPLEXITY. OUTPACE DOWNTIME.

LINK360[®] PROCESS PLUS LOCKOUT SOFTWARE

Dynamic lockout procedure management for process industries

Go from P&ID to procedure faster

Generate accurate, breakdown-specific procedures in seconds

- ▶ Best-practice procedure templates
- ▶ Isolation point, machine, system and procedure library
- ▶ Instant updates and real-time information
- ▶ Printer compatibility for tagging and labeling
- ▶ Trackable checklists and documents
- ▶ Customizable user access and permissions
- ▶ Drag-and-drop procedure creation by isolation point
- ▶ Isolation point photo assigning

TRANSFORMING CHANGE MANAGEMENT

CENTRALIZED CONTROL
End spreadsheet chaos with a single database.

SAFER MAINTENANCE
Updates instantly cascade through the system.

SHORTER SHUTDOWNS
Target isolation points for minimal downtime.

SIMPLIFY YOUR TRANSITION TO SAFER, SMARTER LOTO

LET THE BRADY SAFETY SERVICES TEAM HANDLE EVERY DETAIL

The Brady Safety Services team helps organizations of all sizes and complexities build successful LOTO programs. We'll work to understand your current processes, equipment and energy source identification systems (P&IDs, one-lines), and ultimately ensure your smooth, efficient implementation of Process Plus.

Database Population

Our experts will come on-site to collect and standardize isolation point data, including energy source, magnitude, associated equipment and images. From here, Process Plus is ready for use.

Procedure Creation *(optional)*

To save you even more time, our experts can create procedures for full system, equipment and/or task-specific lockout using your newly created database.

Tag Creation & Installation *(optional)*

And to round out your visual workplace, let our experts create and implement custom equipment and isolation point tags that communicate energy source information and tie back to procedures for more efficient lockout.
